Minimum Footprint. Maximum Signage.

The Intel® Compute Stick transforms any HDMI* display into a digital sign for your business.

Digital signage is the proven method for on-site engagement. Draw foot traffic to the storefront and provide rich interactions that help inform and direct customers while encouraging big baskets.

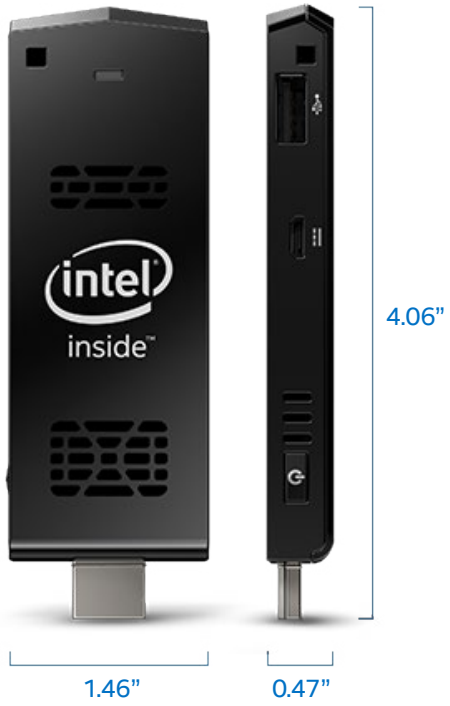
Now digital signage is easy to deploy right out of the box with the Intel® Compute Stick, an ultra-slim compute stick that connects directly to the HDMI* port of a monitor or display. Simply plug it in, connect to the cloud or use local storage to access your files, and you've got a digital sign or POS display.

Powerful, efficient Intel® Atom™ processor

1.33 GHz, 2 MB cache, and a low-energy footprint

Intel® HD graphics, multi-channel digital audio

A rich, immersive experience that captures customers' attention



Measuring in at 4.06" x 1.46" x 0.47", the pocket-sized Intel® Compute Stick delivers an ultra small form factor that fits in virtually any environment. This compute stick also features a security loop to help safeguard against theft and tampering.

Users can also choose between a Windows* 8.1 or Linux* operating system that comes pre-installed, making it even easier to tailor the right solution for any business.

Start with 32 GB storage with Windows* 8.1 or 8 GB with Linux*, add up to 128 GB via microSD

Store advertisements or interactive modules locally for easy access.

Wireless connectivity with Wi-Fi and Bluetooth* enabled

Download files wirelessly or connect peripherals for a full PC experience.

Connect. Compute. With the Intel® Compute Stick, it's that simple. Discover your digital signage solution at intel.com/computestick

Earn 550 points with your first purchase of qualifying Intel® Compute Stick SKUs now through June 30, 2015![1] Learn more at inte.ly/stickpromo

Participants must be active Gold or Platinum Intel® Technology Provider partners to earn points.

Software and workloads used in performance tests may have been optimized for performance only on Intel microprocessors. Performance tests, such as SYSmark and MobileMark, are measured using specific computer systems, components, software, operations and functions. Any change to any of those factors may cause the results to vary. You should consult other information and performance tests to assist you in fully evaluating your contemplated purchases, including the performance of that product when combined with other products. For more complete information visit http://www.intel.com/performance.

Intel® technologies may require enabled hardware, specific software, or services activation. Performance varies depending on system configuration. No computer system can be absolutely secure. Check with your system manufacturer or retailer or learn more at www.intel.com.

1. Valid from April 15, 2015 to June 30, 2015. Participants must be an active Gold or Platinum Intel® Technology Provider partner to earn points. Limit 2,200 points per business. Points will be awarded 4-6 weeks after the quarter ends. Points terms and conditions apply. Visit official promo page at http://inte.ly/stickpromo for eligible SKUS and promo details.
